Portfolio: <http://mario-carranza-portfolio.vercel.app>

Senior Full-Stack Developer and Tech Lead with 6+ years of professional experience, specialized in the design and architecture of highly complex digital ecosystems. Expert in the Laravel and Flutter ecosystem, with strong proficiency in creating multi-tenant SaaS platforms, management dashboards, and integrating RESTful APIs for web and mobile applications. I excel at leading development teams under Agile methodologies (Scrum) and delivering End-to-End corporate solutions from ERP and logistics systems to the implementation of Artificial Intelligence (OCR) for data automation. Strong background in integrating mission-critical services and global payment gateways (CyberSource, Stripe, Transbank).

Core Technical Skills

- **Languages & Frameworks:** PHP (Laravel), JavaScript (React, Vue), Dart (Flutter), Java, C# (.NET Core).
- **Databases:** MySQL, SQL Server, PostgreSQL, MongoDB, SQLite.
- **Integrations & Others:** Artificial Intelligence (OCR document parsing), Corporate API Integrations (DHL, Boxful, Google Maps), Docker, GitHub Actions, RESTful APIs, GraphQL, WebSockets, JWT.
- **Frontend:** HTML5, CSS3, Bootstrap, Tailwind, PrimeReact, Material Design, Alpine.js, Inertia.js.
- **Mobile:** Flutter (Android, iOS, Web, macOS, Windows), GPS, Google Maps, deep linking, state management, multi-language & theme switching.
- **Payment Gateways:** CyberSource, Stripe, Wompi, Square, Transbank.
- **Project Management:** Scrum, Jira, Trello.

Work Experience

Mail Boxes Etc.

Tech Lead & Senior Full-Stack Developer

- Led the architecture and development of an End-to-End logistics ecosystem for courier franchises, fully digitizing the flow of receiving, billing, and delivering international packages.
- Developed the SaaS admin panel in Laravel, featuring an automatic customs tax calculation engine (DAI, IVA) and physical inventory management in warehouses.
- Built cross-platform mobile applications in Flutter for customers and operators, implementing native barcode and QR code scanning for physical locker dispatch.
- Implemented Artificial Intelligence (OCR) for automatic data extraction from PDF/image invoices.
- Integrated mission-critical corporate APIs: DHL (real-time tracking), Boxful (smart lockers), and CyberSource (secure payment gateway).

Carnaval SA de SV (June 2024 - September 2025)

Senior Full Stack Developer

- Led the development of the Integrated Production System, building real-time dashboards for operator efficiency, downtime, and production capacity.
- Developed 3 Flutter mobile apps for time tracking and a management app for centralized planning and daily production monitoring.
- Built an intelligent CRUD module generator using Laravel + React + PrimeReact to create complete screens from column definitions.

IT Project (October 2023 - May 2024)

Full Stack Developer

- **Engineered full-stack solutions**, integrating backend architectures (C# .NET Core, Java Spring Boot, Laravel) with dynamic frontends (Angular, Flutter) based on strict UI/UX mockups.
- **Architected and deployed scalable RESTful APIs**, managing SQL Server databases and containerizing environments with Docker to ensure reliable and fast deployments.

TWGroup (August 2021 - November 2023).

Full Stack Web & Mobile Developer

- Developed **KPitan**, a SaaS multi-tenant platform for POS, sales management, and inventory, with independent subdomains and databases per client.
- Integrated payment gateways such as Stripe, Webpay, and Transbank for automated payments and financial reports.
- Created multiple mobile apps: **PlanApp**, **HugeForest**, **Endolap**, with GPS, user roles, APIs, and state management.
- Led End-to-End technical execution, designing complex relational databases (MySQL, PostgreSQL), orchestrating containerized deployments using Docker, and ensuring high-performance standards across web and hybrid Flutter applications.

Freelance.

Full Stack Developer.

- Worked with clients in Chile, USA, and El Salvador developing solutions such as **WoodChips (Flutter + Laravel + Stripe + Maps)**, **Replavinos**, and **AutoSummit** (car dealership platform with quoting, CMS, and blog manager).
- Built solutions with Laravel, Inertia, Livewire, Alpine JS, React JS, Vue, Flutter.
- Managed projects directly with clients, delivering web platforms, ordering systems with back office, web frontend, and Flutter mobile applications.

Onelink (June 2017- April 2018).

Web Developer.

- Developed, maintained, and supported workflow automations with ProcessMaker.
- Developed and supported intranet requirements using OpenAtrium.

Garan S.A de S.V (3-month temporary position)
System Trainer (End-user Level)

- Trained employees to use the company's registration system.
-

Education

Bachelor's Degree in Software Development Engineering – Universidad Católica de El Salvador

Technical Degree in Computer Systems Engineering – ITCA – FEPADE, 2016

Internships

- Designed and developed a mobile app for stipend management at Fundación Gloria de Kriete (USAID Project).
 - Designed and developed an admin app and API for the **Pencho y Aida** radio program (El Salvador ESMás, USAID Project).
-

Technical Training & Certifications

- C# Xamarin Programming Course – Fundación Gloria de Kriete / USAID (2018–2019).
- ProcessMaker Certified Developer.
- ProcessMaker Certified Advanced Architect.
- Web Development Certification – Next University.
- Online Transaction Security – Eset Latin America Academy.

Other Courses

Life and Work Skills Training – Fundación Gloria de Kriete / USAID (2018).

Soft Skills

- Intermediate Microsoft Office proficiency.
- Conflict management.
- Teamwork and collaboration.
- Adaptability to change.
- Responsibility and accountability.
